

United States Environmental Protection Agency
Region V
POLLUTION REPORT

Date: Friday, December 19, 2008
From: Stavros Emmanouil/Craig Thomas

Subject: Continuation of Removal Action
St. Francis Auto Wreckers
4043 South Pennsylvania Avenue, St. Francis, WI
Latitude: 45.9714000
Longitude: -87.8800000

POLREP No.:	7	Site #:	B5LD
Reporting Period:	12/15/2008 thru 12/23/2008	D.O. #:	0015
Start Date:	10/20/2008	Response Authority:	CERCLA
Mob Date:	10/20/2008	Response Type:	Time-Critical
Demob Date:		NPL Status:	Non NPL
Completion Date:		Incident Category:	Removal Action
CERCLIS ID #:	WID988639068	Contract #	EP-S5-08-02
RCRIS ID #:			

Site Description

See initial PolRep.

Current Activities

Continued the on-site treatment of contaminated soils by using quick lime, in order to reduce the TCLP levels of lead. Approximately 30 cubic yards of materials were treated.

Continued removing the contents of the excavated drums.

Continued the air monitoring of both the perimeter and the work area.

Collected one composite sample from the treated soils for analysis by an outside lab. Analytical test results indicated that the soil treatment was successful.

Transported and disposed off approximately 575 tons of PCB-contaminated soils (approximately 1175 total tons).

Verified that all drums were removed from sections of the excavation zone and started backfilling the area. Confirmation samples were taken from these areas prior to backfilling.

Continued the excavation of areas of concern. Approximately 225 cubic yards of contaminated soils (1625 total cubic yards), 61 drums (251 total drums) and 14 paint cans (14 total paint cans) were removed.

Secured the site for the Holiday Break.

Planned Removal Actions

Remove and Sample Drums & Containers

Sample soil stockpiles & generate waste profiles

Perform Hazard Categorization

Overpack/Repack Drums & Containers

Excavate/Treat Impacted Soils, as necessary

Transport/Dispose Drums & Impacted Soils

Backfill & Grade Excavated Areas

Restore Site, as necessary

Next Steps

Return to site after Holiday Break on January 5th, 2009.

Transportation and disposal of treated soils.

Continue the excavation of contaminated soils and buried drums.

Continue the air monitoring and the sampling activities.

Continue the treatment of the mixed PCB waste.

Key Issues

Secure funding for the continuation and completion of the project.

Disposition of Wastes

Waste Stream	Quantity	Manifest #	Disposal Facility
PCB-Contaminated Soils	1175 Tons	004697003 thru 7012JJK; 004697015JJK; 004697016JJK; 004697428 thru 7446JJK; 004697469 thru 7481JJK; 000193526, 000193527, & 000193529VES	Wayne Disposal; Belleville, MI
