

**United States Environmental Protection Agency
Region II
POLLUTION REPORT**

Date: Tuesday, December 30, 2008

From: Paul L. Kahn, Michael Hoppe

To:	Paul Kahn, ERRD-RPB	Tim Grier, USEPA Headquarters 5202G
	Patricia Carr, USEPA-PAD	Mary Mears, USEPA, Region 2, PAD
	Ellen Banner, USEPA	John LaPadula, USEPA
	Carole Petersen, USEPA	Jim Daloia, USEPA
	Eric Mosher, USEPA	John Higgins, USEPA
	Gregory Deangelis, USEPA Region 2	Andrew Raddant, Department of Interior
	Deborah Schwenk, USEPA	Lisa Levy, OSHA
	Michael Hoppe, USEPA	Kevin McCarthy, Clifton Fire Department
	William Molnar, Sandy Alexander	Albert Greco, City of Clifton
	Tara Donn, USEPA Region 02 CID	Leah Escobar, ATSDR
	Denise Zeno, USEPA	Angela Carpenter, USEPA
	Melissa Dimas, USEPA	

Subject: SPECIAL # 5 and Final
Abrachem Chemical
2 Peekay Drive, Clifton, NJ
Latitude: 40.8306000
Longitude: -74.1231000

POLREP No.:	11	Site #:	A212
Reporting Period:		D.O. #:	
Start Date:	1/2/2009	Response Authority:	CERCLA
Mob Date:	12/30/2008	Response Type:	Time-Critical
Demob Date:		NPL Status:	Non NPL
Completion Date:		Incident Category:	Removal Action
CERCLIS ID #:		Contract #	EP-W-04-055
RCRIS ID #:			

Site Description

At 1615 hours on 10/29/08 EPA received a phone notification from the NRC that a chemical release was occurring at Abrachem Chemical, a bulk chemical packaging facility that leases property in Clifton, Passaic County, NJ. The NJ Dept. of Environmental Protection requested EPA presence at the scene.

At 1730 hours OSC Ellen Banner and OSC Paul Kahn responded to the scene. The company was found to be storing drums and bulk storage containers of known and unknown chemicals in 17 56-foot long intermodal shipping carriers, stacked 3 tiers high (approx. 35 feet). Only 5 of the intermodals could be opened, and inside those it was observed that drums and bulk containers were staged behind tiers of new, blue poly drums which gave the impression that the intermodals were used only for new drum storage.

The owner of Abrachem retained the services of a remediation company which was on the scene, but waiting for EPA to arrive prior to starting work. Contractor personnel were advised to lay poly sheeting and begin removing/overpacking the leaking and unknown drums that were readily accessible. Work commenced almost immediately, but at 2100 hours work was halted due to lack of adequate lighting and the physical inability to access the majority of the drums. Work will resume on 10/30/08 when additional personnel and equipment arrive on-Site.

A meeting was held with the owner, EPA, state, and local authorities at 1000 hours on 10/30/08. At that time a Field Expedient Notice was issued to Mr. Ted Frey, the owner/operator of Abrachem Chemical.

Current Activities

Based on information from EPA contractor-monitors at the Site over the weekend, Abrachem is almost totally moved out of the premises and will most likely meet or be close to the 12/31 deadline to vacate the building. It is also evident that they were not able to properly remove the almost 1,000 drums of haz-

waste still at the Site, which means they would leave those drums in the vacant, unattended building, and outside in the shipping containers and box trailers. The unattended drums would then present a greater threat of a release that could go unnoticed, or worse, unaddressed.

Faced with the prospect of this possibility, EPA activated its Emergency & Rapid Response Services (ERRS) contractor to be on the Site Friday morning, at about the same time when Abrachem should be fully moved out.

During an EPA inspection of the premises on 12/30/2008 the OSC was told by the plant manager that the drums of waste chemicals, in various locations at the Site, were not being removed, and in fact were being left behind when Abrachem vacates the premises. This effectively terminates any effort on the part of the RP to conduct a removal action without an enforcement document.

EPA will meet with the Clifton FD at the Site to exchange phone numbers and establish a protocol for reporting and responding to a release, fumes, smoke, or other emergency situation that might arise until such time as EPA has full access to the Site or another responsible party arranges for an RP-removal action.

Planned Removal Actions

Mobe contractor personnel to the Site by 1/2/2009 and monitor drums until EPA has full access.

Next Steps

See above.

Key Issues

See above.

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
ERRS - Cleanup Contractor	\$250,000.00	\$0.00	\$250,000.00	100.00%
Intramural Costs				
Total Site Costs	\$250,000.00	\$0.00	\$250,000.00	100.00%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
